

BASIC MECHATRONICS WORKSHOP

Light Alarm Device

The idea of the work of this circuit depends on the photoresist, which turns light into resistance, as its value increases when the intensity of the light increases and its value decreases when the light is blocked.

This Project made by:

Ali Mahmoud Khallaf

Kareem Sobhy Abdul-Rahman

Fatima Gamal Taha

Under The Supervision of:

Dr_ Mohamed Abdel-Barr

Dr_ Ahmed El-Sayed

With the help of: ENG_ Ali El-Sayed
